

# Coronavirus Pandemic Response Deep Clean Protocol & Future Prevention

# Purpose

**Protection of all our Clients, Operatives and their families.**

To take an **environment, property, room or environment** from a state of concern regarding **Opportunistic Pathogens** to a state of being **clean and clear of risk** in an **environmentally friendly process**.

# Coronavirus

With **Coronavirus (CoVID19)** now a **global pandemic**, now, more than ever, is the time to provide a solution that creates a **cleaner safer environment**.

Never before have we needed an **environmentally friendly, non-toxic solution that removes** any traces of **coronaviruses including influenza, allergens, mould, germs and VOCs**.

# Who are we

Welcome to **INSITE Specialist Services**, part of the **INSITE GROUP**.

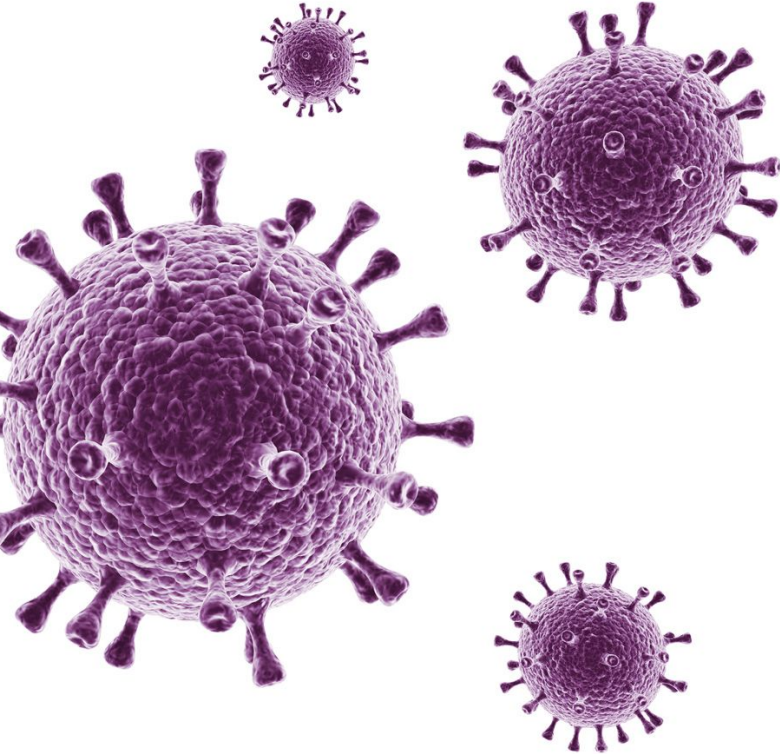

Through our network of operations we're able to provide our customers across the country with a **non-toxic, environmentally friendly** cleaning solution that **removes up to 99.99% of Coronaviruses, influenza, germs, VOC's, moulds and allergens**.

Our dedicated team will work closely with you in order to deliver the best levels of service, offering bespoke solutions for your exact needs. Being specialists, we can assist with a range of indoor & outdoor solutions that suit any environment.

We always aim to provide the best services, whilst offering flexible time slots which work around you and your organisation's needs.

# Our approach

Our highly trained team of specialists provide an **innovative and environmentally friendly infection control decontamination service**.

Available to customers throughout the UK, we arrange for the **cleaning process** to take place around your **specific requirements and environments, eliminating the virus/infections** using our proven products.

All of our operatives are **COSHH (Control of Substances Hazardous to Health)** trained and highly experienced in the handling of our products.

A full comprehensive **risk assessment** that ensures our partners and customers **are safe and clear on the exact cleaning process** will be completed and shared with everyone involved.

# Solution | PB2012

**PB2012**, is a base product for a number of our products which is a synthetic copy of a **natural fungicide, viricide and bactericide**.

It is a high level broad spectrum solution which is effective against all microbial classes up to and including bacterial spores. It is leap forward in reducing cross infections using a proven mechanical kill rather than disinfectants on all surfaces.

**PB2012** has been developed for high level disinfection of hard and soft surfaces, environments, equipment and air. It is to be used in areas in which the reduction of pathogens is needed to be achieved, to enable the interruption of key transmission pathways (surfaces and air) and reduce the risk of cross infection and contamination.

Attack membrane lipids

Mechanical kill rather than disinfectant

Reduces risk of contamination

Antibacterial and antiviral

99.99% decontamination guaranteed

# Our process

A person wearing a dark blue polo shirt with a small logo on the chest is holding a green spray bottle. The background is a bright window with vertical bars, creating a high-contrast, slightly blurred effect.

We've put together a step-by-step guide outlining our infection cleaning process of all areas and touchpoints, so you'll know exactly what to expect from the very beginning.

# Our process

## Toilets/Bathrooms Surfaces

All areas will be steam cleaned above 40°C for one minute, killing all pathogens.

01

03
